

Among the four Oregon campuses, Intel offers an Employee-Commute Option program which includes: intercampus shuttles which also link to local light rail and bus lines; free annual mass transit passes for all employees; and car pool ride-matching coordinated via their website. On a weekly basis, this program saves employees from traveling in single-occupant vehicles equivalent to 73,367 miles, and prevents almost 3,000 pounds of pollution.

At all five Intel Northwest locations, comprehensive recycling programs that make it easy to segregate materials onsite has increased Intel's overall recycling rate to 63%—diverting 7,500 tons from the landfill in 1998. Recycling incentives for Intel's construction contractors proved successful as well--85% of construction material was recycled in October 1998 alone!

Commitment to Environmental Quality

Intel's Corporate Health and Safety Policy emphasizes community involvement, public accountability and continual improvement in developing environmentally-compatible manufacturing processes. Dedicated staff at Intel's regional level support the company's business units in achieving these goals. Intel's *Portland Technology Development Group* embraces a "design for the environment" philosophy, and sets aggressive environmental performance goals for each new technology at the beginning of the development cycle -- where Pollution Prevention can best be accomplished. Partnerships with both equipment and chemical suppliers, as well as other contractors, are intended to help meet Intel's environmental goals.

Environmental Leadership

Intel's Northwest Region pursues greater environmental performance as a normal part of doing business, and has received a variety of honors over the years:

- 1998: Recognized by Tri-Met Transit System for *Leadership in Progressive Commute Options*
- 1997: City of Portland *BEST Business Award*
- 1996: Electronics Industry Association's *Environmental Progress Award*
- 1995: Washington County *Business Recycling Award*
- 1993: National Pollution Prevention Bench Marking *Best in Class*
- 1992: Oregon Governor's *Award for Toxic Use Reduction*
- 1991: Unified Sewerage Agency's *Commendation for Excellence*
